

NO AMERICAN CLIMATE CORPS ACT

Summary:

- The **No American Climate Corps Act** would prevent the Biden administration from furthering its radical anti-American energy agenda.
- The bill simply prohibits any federal funds from being used for the purposes of creating an American Climate Corps or a similar program.

Background:

- On September 20, President Biden announced the **American Climate Corps**, as one component of the Biden Administration's **Justice40 initiative**.
- If launched, the Climate Corps program would consist of 20,000 workers tasked with implementing Biden's radical 'environmental justice' and green energy systems.
- In this new attempt to mimic FDR's New Deal, President Biden has announced he will spend **\$30 billion** of taxpayer money for his climate change army.
- President Biden and Democrats' continued climate change-fueled war on American energy independence will cost over **\$500 billion** in climate spending with the passage of bills like the Infrastructure Investment and Jobs Act, the CHIPS and Science Act, and the Inflation Acceleration Act.
 - These so-called 'investments' have inflicted hyper-inflation on the American people, increased consumer costs, and depleted American energy production capacity.

Bottom Line:

The **No American Climate Corps Act** will prevent President Biden using a climate change army to wage war on American energy independence.
