### Scott Rasmussen National Survey of 1,000 Registered Voters Conducted March 6-7, 2024

#### Executive Summary

- In our most recent survey, we conducted a split sample experiment. Half the survey was asked about spending cuts while half were asked about slowing the growth of spending.
  - On the question of funding for infrastructure projects, the results showed significantly more support for slowing the growth of spending than for cutting spending.
  - There were only modest changes when asking about Social Security and military spending.
- In response to an open-ended question about what it means to be a conservative, 28% mention family and traditional values, and 20% talk about individual freedom.
- In response to an open-ended question about what it means to be liberal, 39% of voters say it is about being focused on equality.
  - An additional 14% associate being liberal with bigger government.
- Only 10% think that biological males who identify as women should be allowed to compete in women's sporting events.
  - Seventy-three percent (73%) disagree and say they should not be allowed to compete in women's sports.
- Just 22% believe it should be legal to provide children under 18 with puberty blockers, drugs, and/or surgery to help them transition from one gender to another. Sixty-four percent (64%) disagree.
- Only 10% of voters have ever introduced themselves using their preferred personal pronouns.
  - Fewer than half (45%) of voters have ever met someone who expressed preferred personal gender pronouns.
- Most voters (77%) think that the federal government doesn't pay enough attention to what voters want.
  - Only 9% of voters think the federal government pays too much attention to voters.
- Just fifteen percent (15%) of voters think it would be better for America if only people with college degrees were allowed to vote.
  - Among all voters, 62% believe this would make things worse, including 49% who say it would be much worse.

Conducted by RMG Research, Inc. March 6-7, 2024  
Margin of Sampling Error: +/- 3.1 percentage points

### Scott Rasmussen National Survey of 1,000 Registered Voters Conducted March 6-7, 2024

#### Methodology

This Counterpolling™ survey of 1,000 Registered Voters was conducted online by Scott Rasmussen on March 6-7, 2024. Field work for the survey was conducted by RMG Research, Inc. Certain quotas were applied, and the sample was lightly weighted by geography, gender, age, race, education, internet usage, and political party to reasonably reflect the nation's population of Registered Voters. Other variables were reviewed to ensure that the final sample is representative of that population.

The margin of sampling error for the full sample is +/- 3.1 percentage points.

This survey was paid for by RMG Research, Inc. as part of the service provided for our Gold Circle Members.
